! CAUTION!

Please charge lithium battery devices at least 6h every 6 months to extend battery life.

III.Operation Instruction

1.Power ON

Slide the switch to "I"
to turn on the motor

Press the Pairing
button for 1 second
then release it. The
motor will jog once

Press the UP button on the remote
The motor will jog again to confirm
the pairing is complete

2.Programming Preparation

*If there is no action in 10 seconds, the motor will exit programming automatically

1、 To set the upper limit, first open the battery cover on the back of the remote and locate the small programming button.

2、 Move the roller shade to the desired position. Press the round button on the back of the remote, then press the UP button, and press the round button again. The motor will jog to confirm the upper limit is set.

3、 To enable jog mode,press and hold thestop button for 5seconds. The motorwill jog once. Then press the stop button once. The motor will jog again to confirm jog mode is enabled.

3.Delete All Pairings

*Method A

First, press the pairing button twice with short presses (about 1 second each), then press and hold the pairing button twice (about 5 seconds each). The motor will jog twice, indicating that all remote control pairings have been successfully deleted. After unpairing, the remote control will no longer operate the roller shade.

*Method B

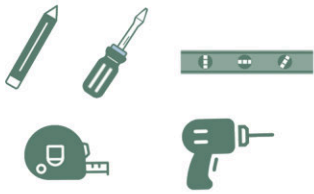

First, press and hold the middle button on the remote control for 5 seconds until the motor jogs once. Then press and hold the button on the back of the remote control for 7 seconds. The motor will jog twice, indicating that all remote control pairings have been successfully deleted.
